Aim

To integrate the **Gym Membership Enrollment & Front Desk Management** application in Zoho Creator with **Bigin by Zoho CRM** using a microservice connection, form workflow, and Deluge scripting, so that member details submitted through the **Membership Enrollment Form** are automatically created as records in Zoho CRM.

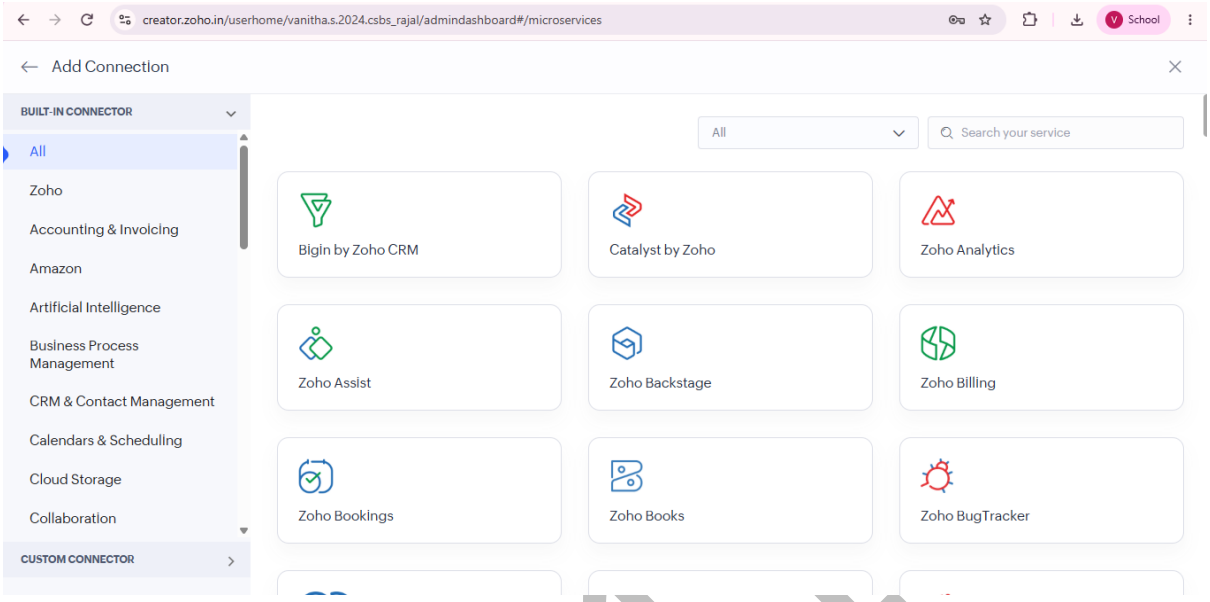

Procedure

Phase A: Creating the Bigin by Zoho CRM Connection

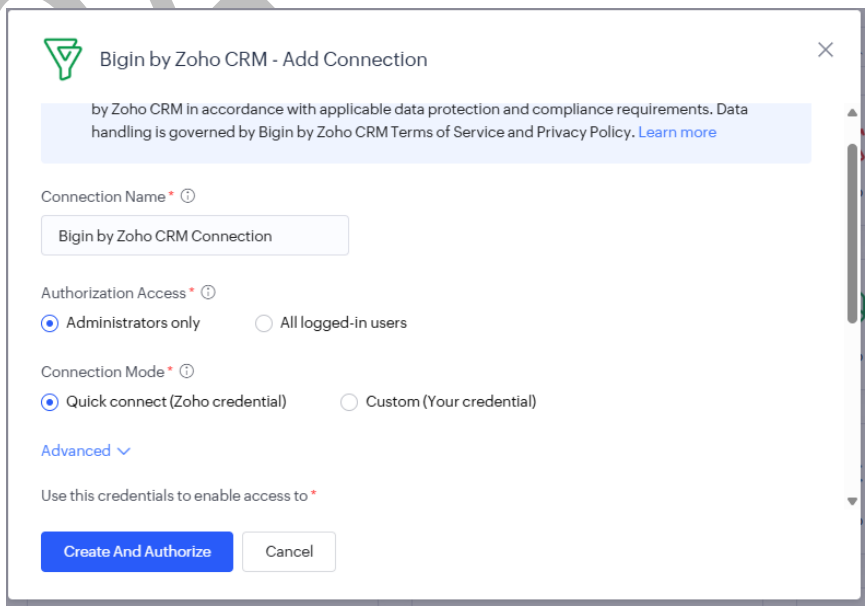

1. Log in to **Zoho Creator** and open the **Gym Membership Enrollment & Front Desk Management** application.
2. Under the **Develop** section, open **Microservices**.
3. Select the **Connections** tab and click **Add Connection**.

4. The Create New Microservice window lists the available microservice types (AI Models, AR Library, Connections, Data sources and Custom API). For Connections, click Pick & Create to open the list of built-in connectors.

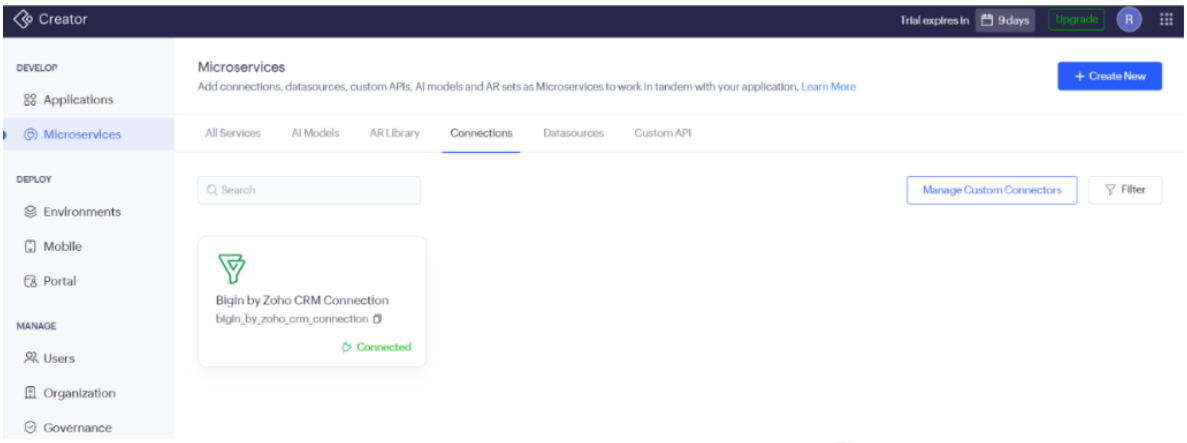

5. From the built-in connectors, select **Bigin by Zoho CRM**.
6. Enter the connection details:
    1. **Connection Name:** Bigin by Zoho CRM Connection
    2. **Authorization Access:** Administrators only
    3. **Connection Mode:** Quick connect (Zoho credential)
    4. **Access:** All Actions
7. Click **Create And Authorize**.

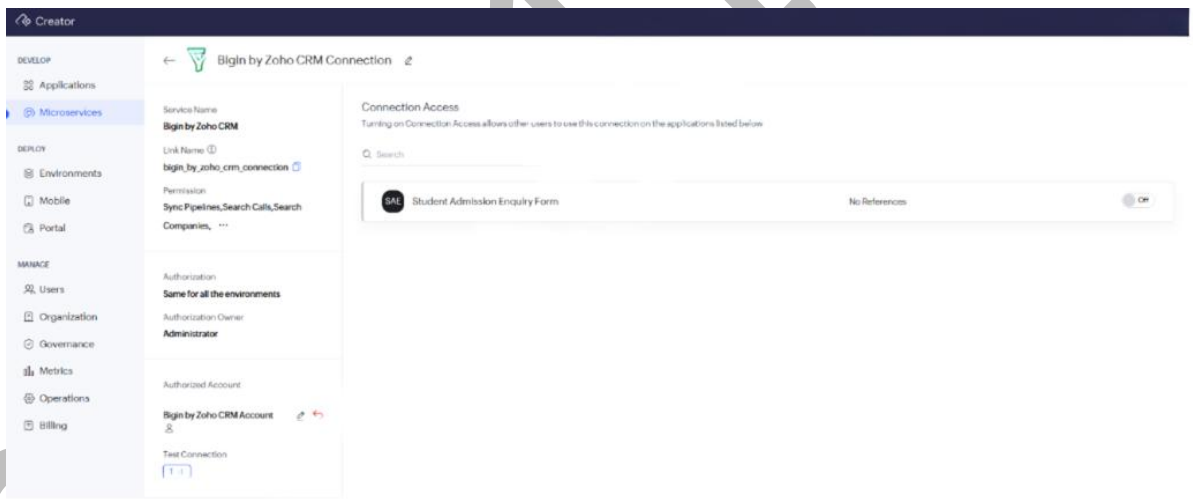

Phase B: Verifying the Connection

8. Go to **Microservices → Connections** and check that the **Bigin by Zoho CRM Connection** displays a green **Connected** status.

9. Open the connection and note its **Link Name**. This link name will be used in the Deluge script.

Phase C: Setting Up the Form Workflow

10. Return to the application and select:

    Membership_Enrollment_Form

11. Open **Workflow** and create a new **Form Workflow**.

12. Configure it to run on:

    Created → Successful form submission

13. Set **Run this action → Always**.

14. Choose **Deluge Script** as the action type.

15. Phase D: Writing the Deluge Script

16. Create a map containing your gym member information.

Member_Name → Last_Name

Email_Address → Email

Contact_Number → Phone

Membership_Plan → Description

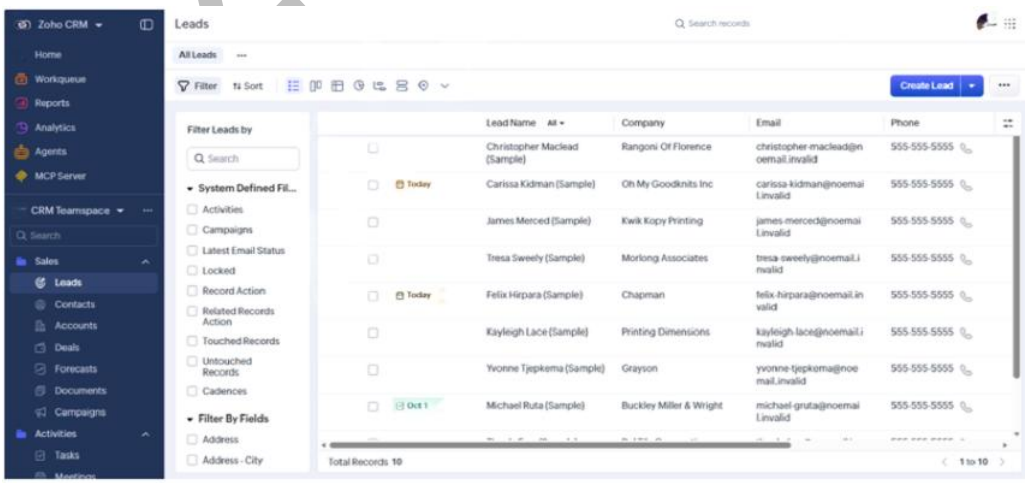

Output & System Verification

The **Gym Membership Enrollment Form** is connected to Bigin by Zoho CRM through a microservice connection and form workflow.

After submitting a new gym membership record:

- The workflow runs automatically.
- Member details such as **name, email, contact number, and membership plan** are transferred.
- The connection status can be verified as **Connected**.
- The created record can be checked in the configured CRM/Bigin module.

Conclusion

Thus, the **Gym Membership Enrollment & Front Desk Management** application was successfully integrated with **Bigin by Zoho CRM** using **Connections, Form Workflow, and Deluge scripting**. The integration automatically transfers submitted gym membership details from Zoho Creator to the connected CRM service, reducing manual data entry and improving member management.
